todl goes green

It seems that 'green' is the buzzword of our industry these days... and rightfully so.

Being at the product specification side of the industry for more than 15 years, I've seen eco-friendly products come full circle. Today, the 'green' products I see are not only beautiful and applicable to mainstream design, but the quality matches—and in some cases exceeds—their 'non-green' counterparts.

stacey tiveron
CEO, TODL.com

Manufacturers are finding that options for 'greening' their production process as well as material choices are no longer cost-prohibitive, allowing them to make earth-friendly decisions that don't adversely affect their bottom line.

TODL Green offers an instant solution for A&D professionals to make earth-friendly product choices. TODL Green provides a product research category—set in the same, easy-to-use database as TODL—that exclusively features products that are eco-friendly.

Every action each of us takes to be more earth-conscious affects change.

I invite you to login and see **TODL Green** for yourself.

Best Regards,
Stacey

Other Product Certifications:

Low VOC cork, finish and glue.
Contributes to LEED credits:
LEED MR Credit 4.1: Recycled Content: 10% (post-consumer + 1/2 pre-consumer)
LEED MR Credit 4.2: Recycled Content: 20% (post-consumer + 1/2 pre-consumer)
All DuroDesign cork flooring is composed of 100% pre-consumer recycled waste from the wine-stopper industry.
LEED MR Credit 6: Rapidly Renewable Materials

For Immediate Release June 7, 2007

TODL.com (Trade Only Design Library), the industry leader in online product research and specification for over 10 years, announces the launch of TODL Green.

TODL has over 32,000 A&D members who can search through 200,000 products from more than 900 manufacturers. TODL's members are currently able to locate products for residential, contract and hospitality projects which include architectural elements, seating, casegoods, lighting, flooring, wallcoverings, fabrics, plumbing fixtures and more.

TODL now introduces TODL Green: a product-level resource for specifying recycled, sustainable and eco-friendly products. TODL Green allows trade buyers to easily search through thousands of products from more than 100 green manufacturers, with the list growing daily.

"While TODL's business model was green from the beginning—paperless product research lessening the need for expensive catalogs that eventually end up in our landfills—we've always had the vision of a TODL search category dedicated to eco-friendly products," said CEO Stacey Tiveron.

"Each of the products found in TODL Green have an explanation as to why it is green and those with certifications are clearly noted," said Vice President Jessica Alexander. "This makes green product research easy for all trade members no matter what their level of green education."

TODL is committed to supporting environmental responsibility and education through this "green meeting place" for the professional buyer.

the green team

jessica alexander
kim gordon

Jessica Alexander, Vice President of TODL, has been working with TODL's manufacturers and designers for 9 years.

Jessica's industry experience and understanding, coupled with her passion for protecting the environment, led to her spearheading the creation of TODL Green.

Jessica co-wrote TODL's green initiatives and is responsible for the launch of TODL Green this year. She has also personally changed all of TODL's in-house office policies with regard to waste, recycling and repetitive office product selection.

Kim Gordon is a Master Recycler with a B.S. in Environmental Science, Kim has spent more than 15 years working and training in various aspects of the eco-industry.

At TODL, Kim learned the design industry and saw the relationship between product sales and impact on the environment. Kim helped to mold the mission of TODL Green and works with TODL manufacturers to assist them in "greening" their products and/or manufacturing processes.

Kim and her husband own a natural fiber clothing and accessories line which promotes rapidly renewable resources and organic fibers. They enjoy a green lifestyle together, especially time spent in their organic garden.
